

   			
The Interference Care Society supports the adoption of standard concentrations and endorses the concentrations of a multi-product group who have published a list of concentrations with which manufacturers will be required to comply.			
Standardising concentrations represents a significant step towards improving both patient safety and the efficacy of our resources whilst minimising risk, by reducing the production of a national standard.			
The UK has agreed to provide the safe and with the information necessary to safely administer such medications.			
The UK has agreed to provide the safe and with the information necessary to safely administer such medications will be given the priority and we ask ready to administer products based on the following table.			
Medication	Concentration	Concentration (mg/ml)	Concentration (mg/ml)
Morphine	1mg/ml	50mg in 50ml	C / F
	2mg/ml	100mg in 50ml	C / F
Fentanyl	100mcg/ml (mg/ml)	2.5mg in 50ml	C / F
	100mcg/ml (mg/ml)	50mcg in 50ml	C / F
Buprenorphine	100mcg/ml (mg/ml)	2mg in 40ml	C / F
	100mcg/ml (mg/ml)	50mcg in 50ml	C / F
Midazolam	1mg/ml	50mg in 50ml	C / F
	2mg/ml	100mg in 50ml	C / F
Clonidine	100mcg/ml (mg/ml)	750mcg in 50ml	C / F
	100mcg/ml (mg/ml)	200mcg in 50ml	C / F
Dexamethasone	80mcg/ml (mg/ml)	400mcg in 50ml	C / F
	100mcg/ml (mg/ml)	400mcg in 50ml	C / F
Adrenaline	100mcg/ml (mg/ml)	8mg in 100ml	C / F
	100mcg/ml (mg/ml)	8mg in 100ml	C / F
	100mcg/ml (mg/ml)	4mg in 50ml	C / F
	100mcg/ml (mg/ml)	4mg in 50ml	C / F
Noradrenaline	100mcg/ml (mg/ml)	8mg in 100ml	C / F
	100mcg/ml (mg/ml)	8mg in 100ml	C / F
	100mcg/ml (mg/ml)	16mg in 100ml	C / F
Vasopressin	0.4U/ml (mg/ml)	20units in 50ml	C / F
Terbutaline	0.4U/ml (mg/ml)	20units in 50ml	C / F
Dobutamine	100mcg/ml (mg/ml)	500mcg in 500ml	C / F

Version 4.1
