

MRI for Neurocritical Care Patients

University College **NHS**
London Hospitals
NHS Foundation Trust

Please ensure all of the steps below are followed when a neurocritical care (NCC) patient requires MRI

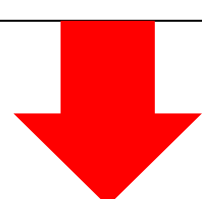

STEP 1

BOOK PATIENT FOR MRI ON
PINK EMERGENCY LIST
- 2ND FLOOR THEATRE RECEPTION

STEP 2

CONTACT THEATRE CO-ORDINATOR
- 07967 773925 **PLUS**
2ND ON CALL ANAESTHETIC SpR
- BLEEP 8011

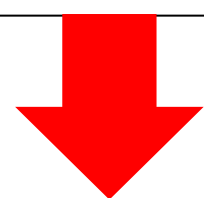

STEP 3

BOOK TIME SLOT WITH MRI
- EXT 83581 / 83074

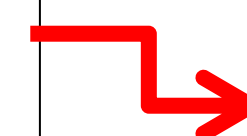

*MRI may already be
booked by
Neurosurgery /
Neurology / Stroke*

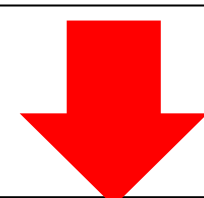

STEP 4

INFORM BOTH NCC NURSE-IN-CHARGE &
BEDSIDE NURSE THAT PATIENT HAS BEEN
BOOKED FOR MRI

*Bedside nurse
prepares patient
for MRI with line
extensions, etc*

NCC NURSE MUST ESCORT **ALL**
PATIENTS TO & FROM MRI

Awake Patients on infusions

- ODP will attend MRI to connect monitoring and help with pumps, but it is not their role to monitor and be in sole charge of the patient
- NCC nurse in charge + ITU consultant will decide whether anaesthetic escort (2nd on SpR) is required in addition to NCC nurse for 'out of hours' MRI for patient on inotropes
